

Hack Pokemon GO without moving in Android

Pokémon Go continues its huge surge of international popularity, there have already been a wide variety of creative methods from various players who have tried in various ways to beat the system. Tones and tones of Pokemon GO hacks have been released for each Smartphone platform. Even we have published Pokemon GO hacks for Rooted Android device. But today we're here with Pokemon GO hack for Non-Rooted Android.

This method does not require any Root not even any kind of Custom recovery. This method does work on any Android device. If you follow each steps correctly, you'll get Pokemon GO Android hack with Joystick (Arrow keys) to move along with location spoofing which means you can play Pokemon GO from any location in the world. Entire method is really simple to follow. Let's just jump into the guide. Don't forget, rooted hack has much more features & advantages over non-rooted Hack. This Guide is for devices running Android Marshmallow & above.

Prerequisites:

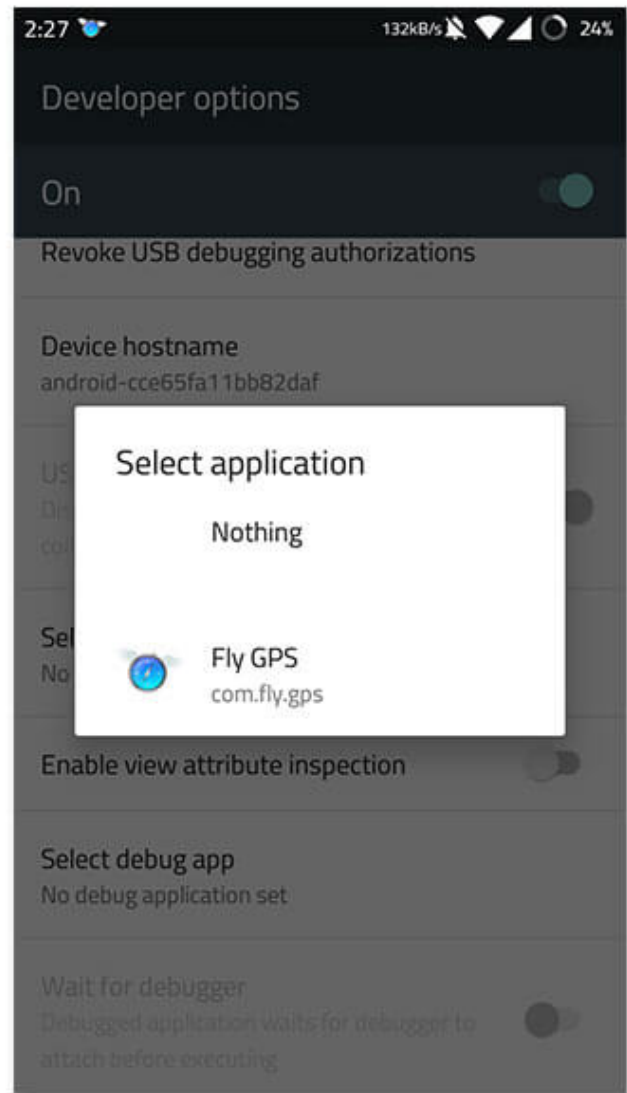

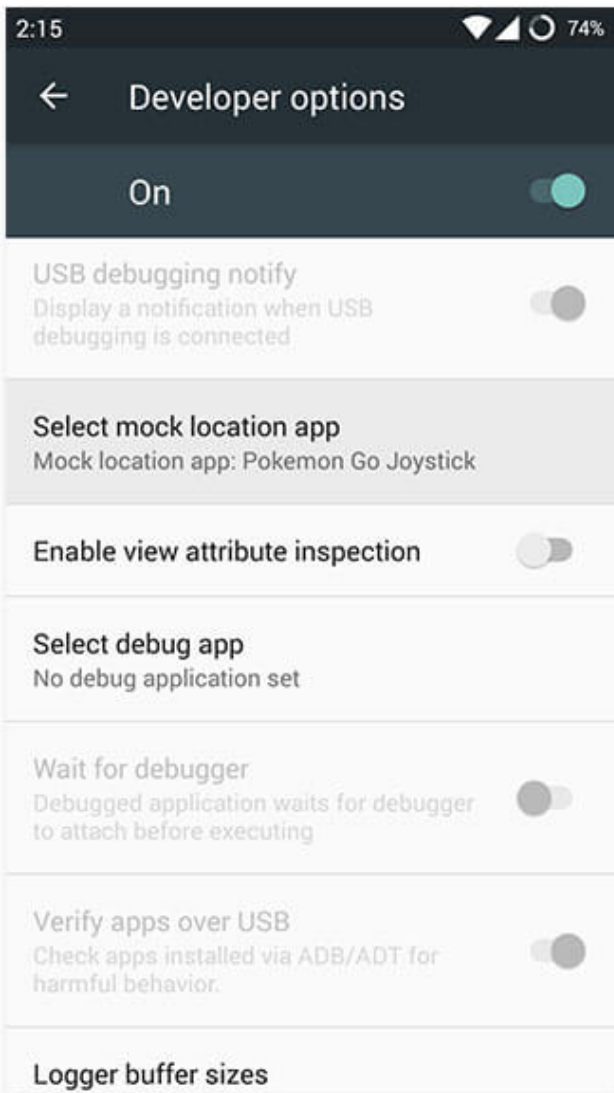

1. [Pokemon GO Game](#)
2. [Pokemon GO Fly GPS Hack \(Fake GPS\)](#)

How to setup Pokemon GO GPS hack in Android (No Root)

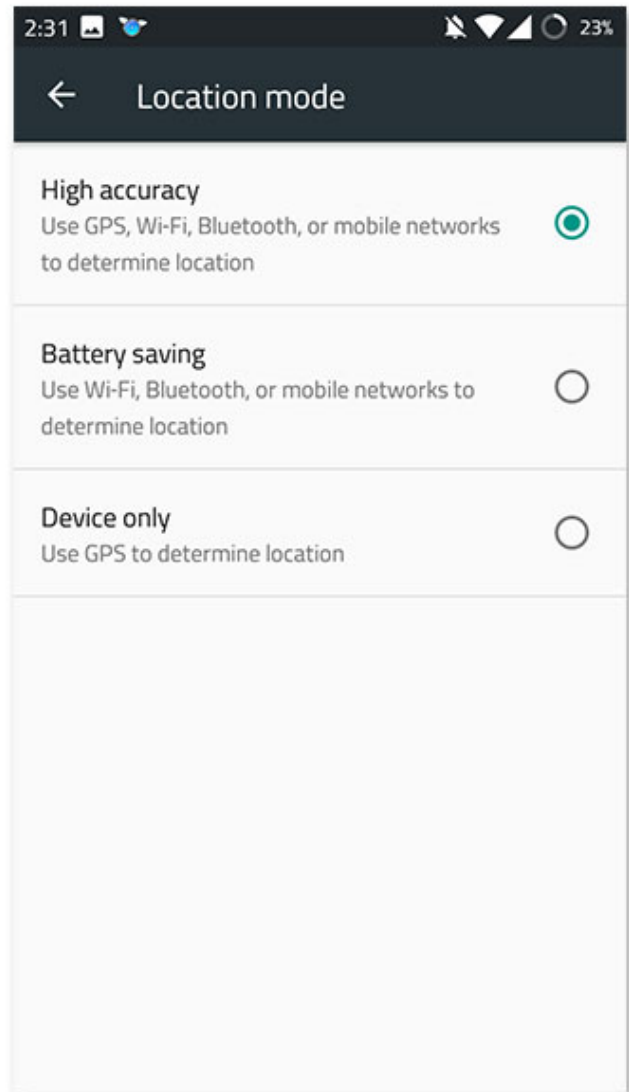

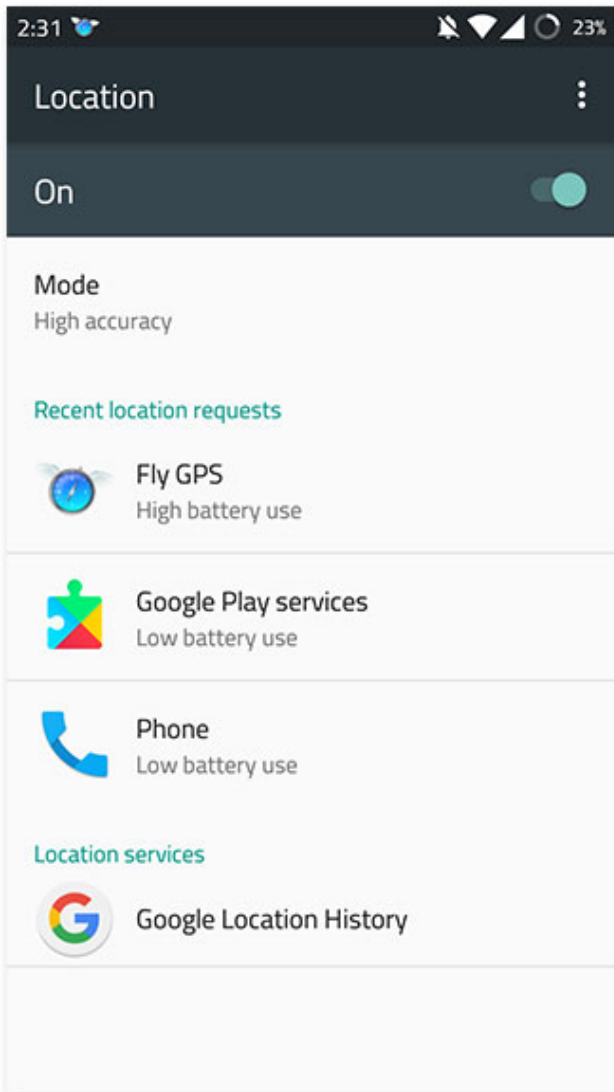

Step 1. Download and install the required [Apps](#) mentioned above.

Step 2. Go to Settings App > About Phone > Tap on build number 7 times to activate Developer options in your device.

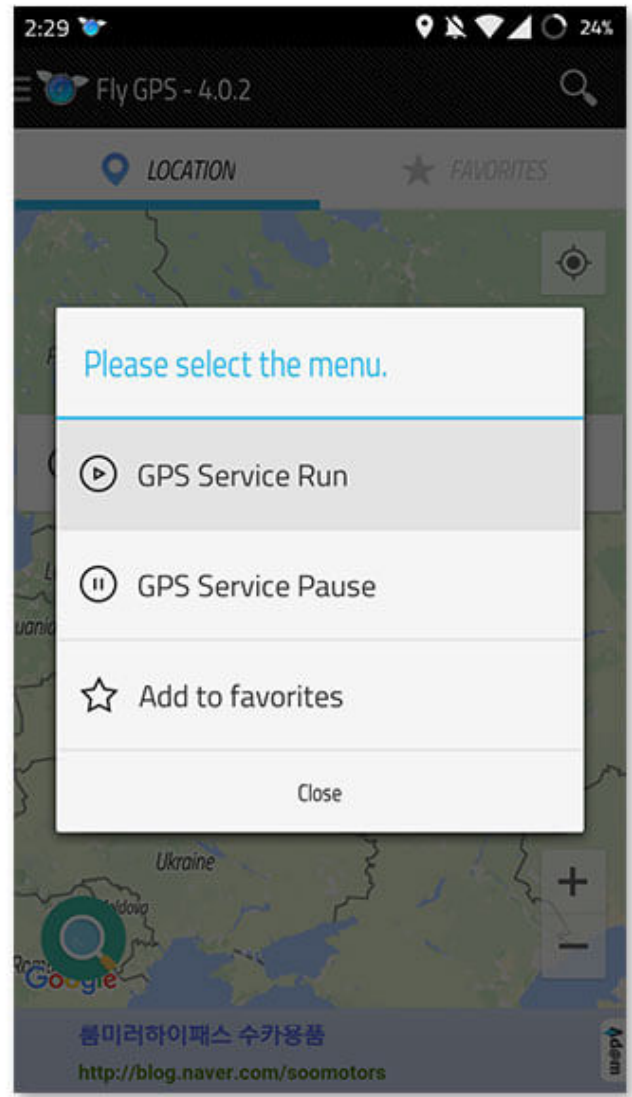

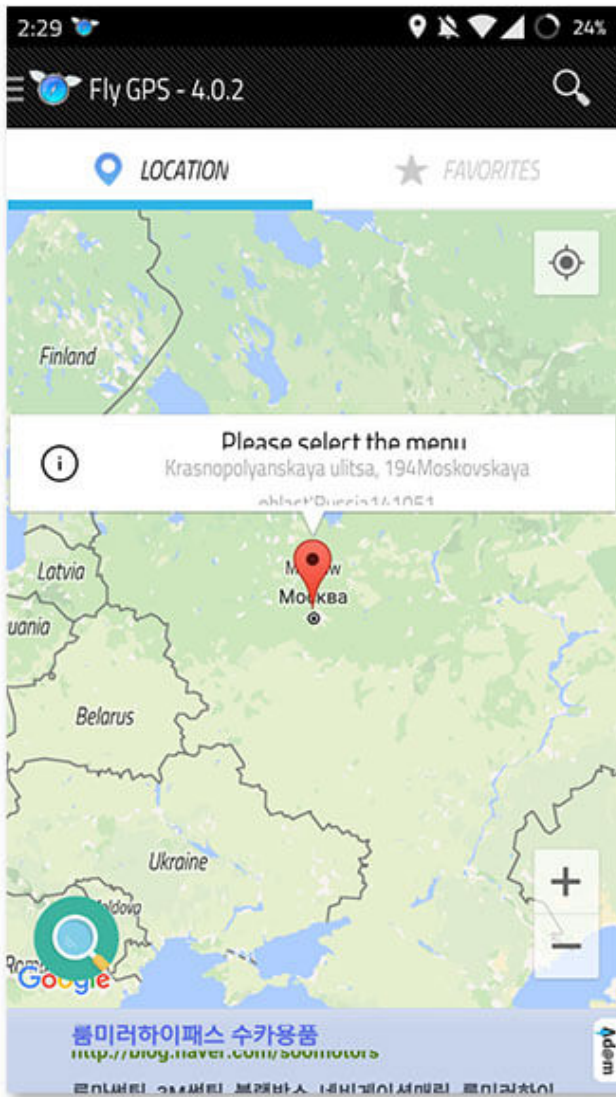

Step 3. Go back to Settings > Developer options. Locate “Select mock location app” & select Fly GPS (com.fly.gps)

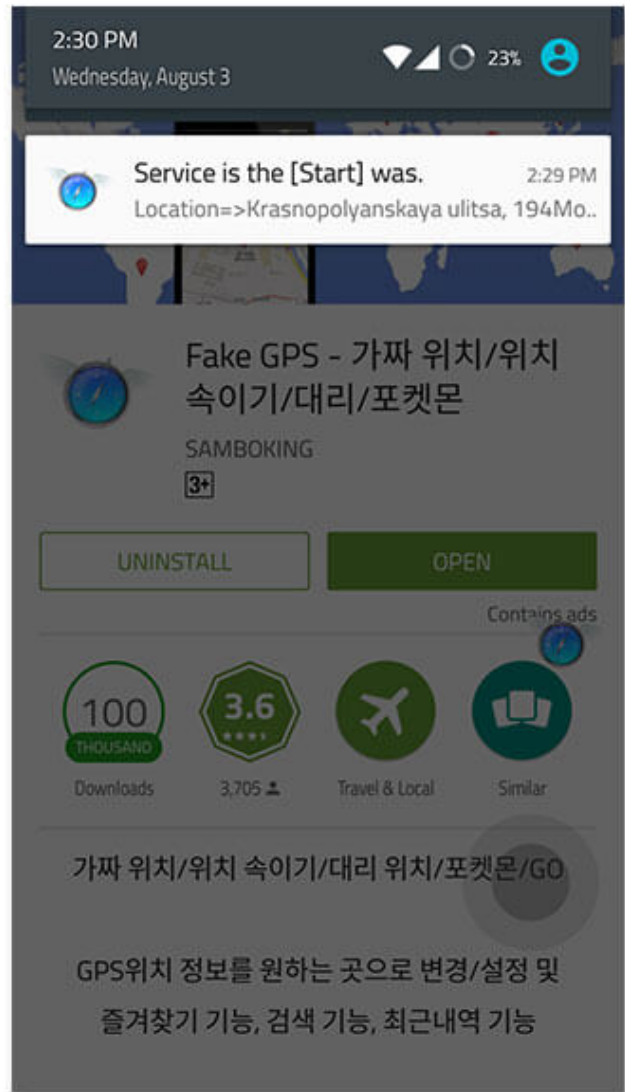

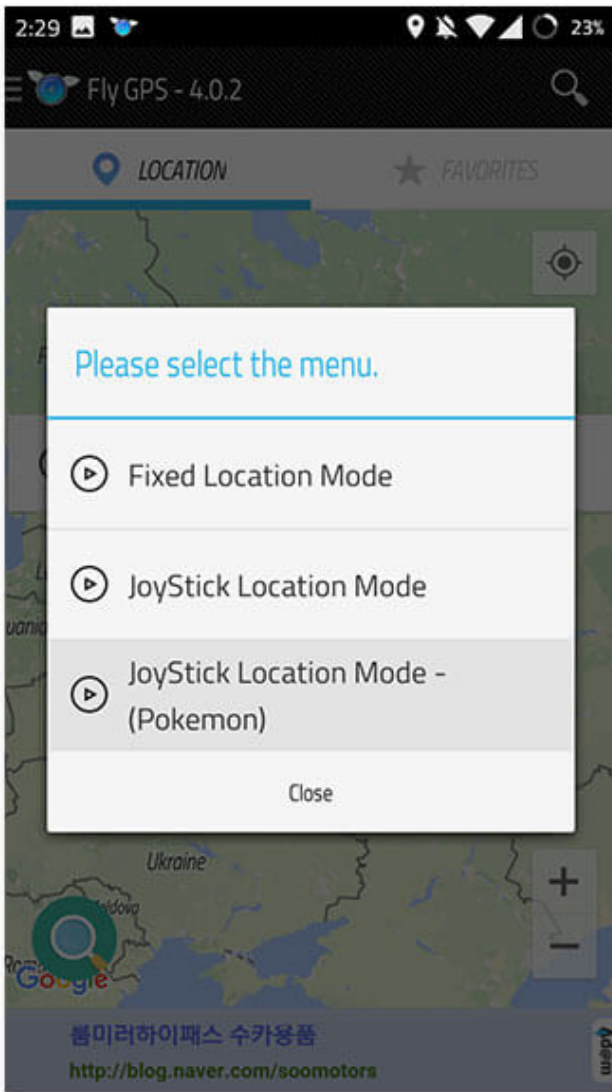

Step 4. Again go to Settings > Location & set GPS mode to High accuracy (Use GPS, WiFi, Bluetooth or mobile data)

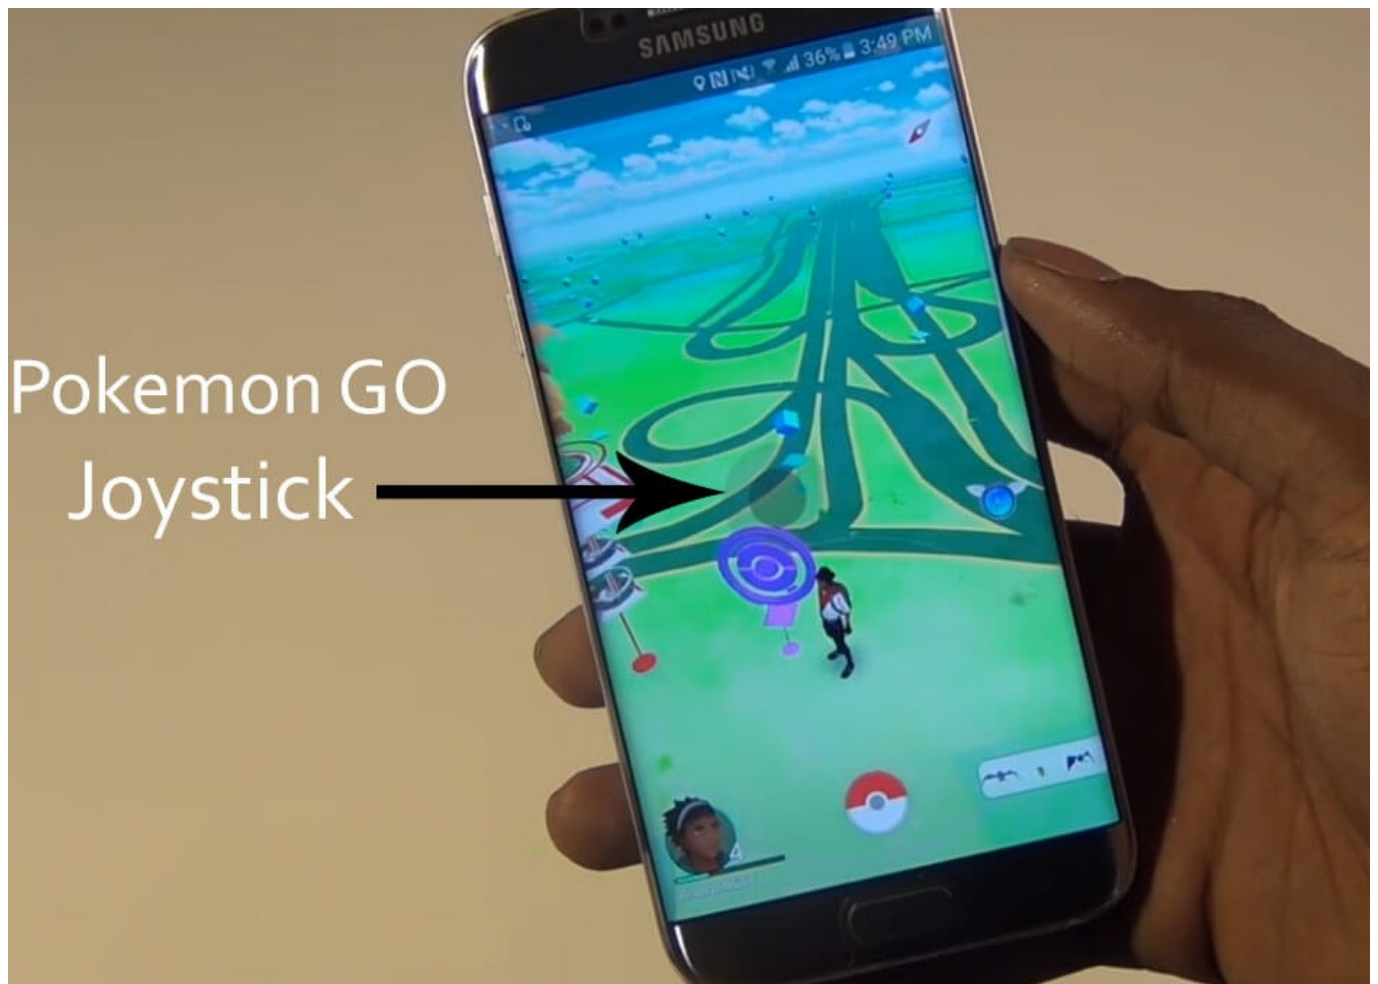

Step 5. Now launch Fly GPS app & locate any location you want to go. Click on the desired location & hit “Please select the menu”.

Step 6. Tap on “GPS Service Run” which will open up another menu. Tap on “Joystick location mode [Pokemon]”.

Step 7. That's it! Now launch Pokemon GO Game & you'll see a Joystick to move around.

Pokemon GO Joystick

You can level up easily & faster using this. If you live in small town or somewhere where there's not much of Pokemon, this hack could be very beneficial & easy to use. This hack is for those who don't want to root their device. Don't forget, rooted hack has much more features & advantages over non-rooted Hack. But don't worry! The app developer may come up with lot more features in Non-rooted version too.
